A dedicated Front-End Engineer with 8 years of expertise in React, TypeScript, and Angular. I excel at crafting elegant, user-centric interfaces and enhancing productivity through cutting-edge technologies and best practices. My strong skills across the frontend stack help me solve complex challenges and deliver high-performance applications and exceptional products.

Experience

Lead Frontend Engineer

2020 - Present

- Architected and led the development of an AI-driven B2B SaaS cybersecurity platform, delivering seven unique modules and resulting in increased client satisfaction by utilizing ANGULAR 18 and REACT NATIVE.
- Spearheaded client interactions to gather comprehensive product specifications and requirements, ensuring alignment with customer expectations and business objectives.
- Managed a front-end team that optimized the UI/UX testing process and streamlined the CI/CD pipeline, significantly reducing deployment times and enhancing overall product quality.
- Led the creation of online content and a blog in NEXT.JS, boosting user engagement and enhancing the product's online presence.

JR Frontend Developer

2017 - 2020

- Built and enhanced features & components such as task managers, calendar/meeting interfaces, large-scale data loaders/integrations, dashboards, forms, and chatbots.
- Collaborated closely with cross-functional teams, including UX/UI designers and back-end developers using NODE.JS and JAVA.
- Assisted in debugging and testing, identifying and resolving critical issues to improve software stability and reduce post-release bugs.

Lead React Native Engineer

2017

- Led an engineering team in the development of a mobile application built in React Native.
- Engineered key features and collaborated directly with the founder and designers to refine and enhance product functionality.

Education

Online Learning and Bootcamps

Continuous

University of Pennsylvania

2016

- B.S. in Mechanical Engineering & Applied Mechanics
- Varsity Rowing
